

This form must be filled out by a general practitioner or medical specialist and sent to Aide financière aux études by the student to declare their dependent child’s major functional disability or mental disorder.

To declare a student’s major functional disability, please use form 1015: *Medical Certificate – Student – Major Functional Disabilities and Other Recognized Disabilities*.

If the child has a severe visual disability, a copy of the Canadian National Institute for the Blind (CNIB) card, an attestation issued by a low-vision centre or a document attesting to blindness may be submitted instead.

All sections of the form must be filled out. Depending on the situation, the major functional disability must be described in Section 3 and the mental disorder in Section 4.

The student must sign Section 6 – Student’s Authorization and Attestation.

Section 1 – Identification of Student

Last name

First name

Date of birth

Y	M	D
<input type="text"/>	<input type="text"/>	<input type="text"/>

Permanent code assigned by the Ministère

Section 2 – Identification of Student’s Dependent Child

Last name

First name

Date of birth

Y	M	D
<input type="text"/>	<input type="text"/>	<input type="text"/>

Permanent code assigned by the Ministère

Section 3 – Recognition of Child’s Major Functional Disability

Fill out this section if the child has a **major functional disability**.

The disability is: Temporary Permanent

Can you confirm that the child’s disability result in significant and persistent limitations in accomplishing daily activities? Yes No

State the date on which these significant and persistent strictures began:

Y	M	D
<input type="text"/>	<input type="text"/>	<input type="text"/>

What is the diagnosis? _____

Date of the diagnosis:

Y	M	D
<input type="text"/>	<input type="text"/>	<input type="text"/>

Check off the type of disability:

Severe visual impairment

Visual acuity in each eye, after correction by means of appropriate ophthalmic lenses, excluding special optical systems and additions greater than 4.00 dioptres, is not more than 6/21, or the field of vision in each eye is less than 60 degrees in the 180-degree and 90-degree meridians and, in either case, the person is unable to read, write or move about in an unfamiliar environment.

Yes No

Severe hearing impairment

The ear having the greater hearing capability is affected by a hearing deficiency evaluated, according to 1992 Standard S3.21 of the American National Standard Institute, to be an average of at least 70 decibels, in aerial conduction, on any of the 500, 1 000 or 2 000 Hertzian frequencies. In that case, you must include an audiogram with this form.

Yes No
